

# WE SAY NO TO A LARGE SCALE INCINERATOR IN GLOUCESTERSHIRE

Petition by residents and visitors of Gloucestershire

We the undersigned request the Gloucestershire County Council, the District Councils of Gloucestershire and the Government not to accept a large scale incinerator as the solution for dealing with residual waste in Gloucestershire because:

- Tackling climate change is a priority and better technologies are available
- It produces toxic fly ash
- It reduces the incentive to reduce, reuse, recycle and compost thus wasting resources
- It could be a high risk, long term, contractual expense for the local taxpayer
- If needed, residual waste should be treated under short term contracts by small local facilities
